Illud autem sciendum est et modis omnibus retinendum: commisso bello prima ac secunda acies stabat in mota, triarii quoque residebant. Ferentarii autem, exculcatores, sagittarii, funditores – hoc est levis armatura – adversarios provocabant, ante aciem praecedentes. Si hostes fugare potuerant, sequebantur; si eorum virtute aut multitudine premebantur, revertentur ad suos et post eos stabant.

Excipiebat autem proelium gravis armatura, et tamquam murus, ut ita dicam, ferreus stabat et non solum missilibus sed etiam gladiis cominus dimicabat. Et si hostes fugasset, non sequebatur gravis armatura, ne aciem suam ordinationemque turbaret, sed levis armatura – cum funditoribus, sagittariis et equitibus – fugientes sequebatur inimicos. Hac dispositione atque cautela sine periculo legio vincebat aut superata servabatur incolumis.
